

For ultimate esthetic results

Variolink® N

Adhesive cementation for demanding restorations

Highlighting the final esthetic outcome

More than

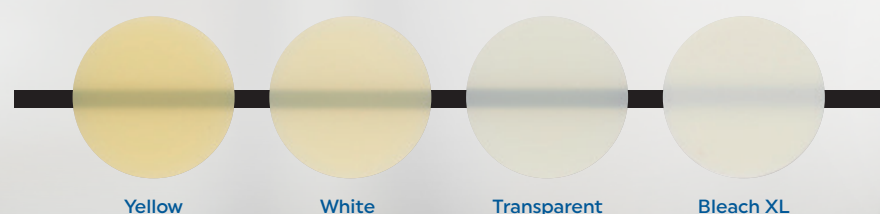

15 million

restorations seated worldwide^[1]

Variolink N is an esthetic light- and dual-cure luting material for the adhesive cementation of demanding restorations.

- ✓ Harmonious shade range supporting optimum esthetic results of the final restoration
- ✓ Available in four different shades

- ✓ Customized consistency options that match the demand of the specific indication
- ✓ Easy identification of excess thanks to high radiopacity

- ✓ Restoration types: inlays and onlays, veneers and crowns
- ✓ Materials: glass-ceramics, lithium disilicate and composite resins.
- ✓ Adhesives from the Ivoclar portfolio: Tetric N-Bond Universal, Syntac, Excite F DSC

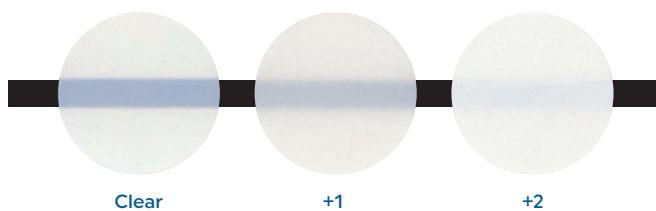

[1] Based on sales figures

For anterior restorations

Variolink N LC is an esthetic light-cure luting material especially suitable for adhesive cementation in the anterior region.

- ✓ Recommended for very thin (<2 mm) and highly translucent restorations
- ✓ Three different shades offering a brightening effect
- ✓ Shade stability under intensive daylight due to the amine-reduced formulation
